HOT HOT HOT

The
Climate Change
Show

Tackle **Global Warming & Climate Change** with a positive approach.

This show presents students with the opportunity to change their planet for the better. Comedy meets science, as hilarious theatre and practical demonstrations combine to show that every student really can play a part on the world stage.

Why is the earth getting hotter?

A simple overview of the major reasons, both man-made and natural, for global warming, gives students a platform from which to understand the need for action.

If we do nothing?

Our changing climate will have dramatic effects on the way we live. Students learn how their own lives will change, and what others around the world will face.

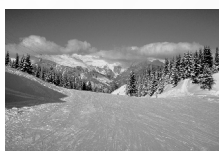

What is the climate and why is it going to change?

Explaining the difference between weather and climate, the show next demonstrates why global warming will change climate patterns.

If we do something?

It is unlikely that global warming and climate change issues will disappear in the lifetime of students, but we can act to reduce problems, and learn to adapt to the changes.

HOW COOL ARE YOU? TAKE THE CHALLENGE!

Students take "The Climate Change Challenge" to close the show!
